DMHAS Releases Aggregate Data of Laboratory Confirmed Cases of COVID-19 in DMHAS Facilities

Hartford, CT – The Connecticut Department of Mental Health and Addiction Services (DMHAS) today released aggregate data of the reported number of laboratory confirmed cases of COVID-19 identified in patients within its state-operated inpatient facilities and staff employed throughout the DMHAS system. DMHAS operates over 760 mental health and substance use beds and employs approximately 3,300 staff throughout the state-operated service system.

	Laboratory Confirmed Cases of COVID-19	
	Patients	Staff
Connecticut Valley Hospital	23	15
Whiting Forensic Hospital	9	16
Capitol Regional Mental Health Center	0	1
Connecticut Mental Health Center	0	5
River Valley Services	0	0
Southeast Mental Health Authority	0	0
Southwest Connecticut Mental Health System	0	3
Western Connecticut Mental Health Network	0	3
Total:	32	43

As outlined in the non-test based criteria disseminated by the Center for Disease Control and Prevention [Guidance regarding Discontinuation of Transmission-Based Precautions and Disposition of Patients with COVID-19 in Healthcare Settings](#), patients at DMHAS are recovering from COVID-19.

To date, 9 patients at Connecticut Valley Hospital and 6 patients at Whiting Forensic Hospital have recovered from the virus. Additionally, 18 staff members have provided medical documentation showing they have recovered from COVID-19, allowing them to return safely to work.

DMHAS has taken significant steps to protect clients and staff from COVID-19 throughout the DMHAS system. These include:

- Identifying spaces in all state-operated facilities to be used for the isolation of patients with COVID-19;

- Distributing personal protective equipment (PPE) including n95 masks, surgical masks, gowns, gloves and hand sanitizer to all state-operated facilities;
- Developing quarantine and isolation protocols for patients and staff that have been reviewed and approved by the Department of Public Health;
- Adjusting outpatient services while promoting social distancing including telephone check-ins and closing wellness centers and social clubs;
- Restricting visitors from DMHAS facilities;
- Conducting health screenings of all individuals who enter DMHAS facilities, including staff and clients;
- Approving over 1,100 employees for telework to promote social distancing and minimize exposure to clients and staff at DMHAS facilities; and,
- Directing staff who are symptomatic or have been in close contact with individuals suspected of or having COVID-19 to stay home and self-quarantine to prevent infecting clients and other staff.
